Good things
come from
Sysco | *Ingenium* **MAX**

Nursing homes, rehabilitation centers, assisted living facilities, and small hospitals can take advantage of this resident-driven system, while having flexibility in the 5 modules available to implement: Nutrition Care Plans, Menus, Production, Costing, and Assessment.

Benefits include:

Offer better service and care to residents

- Provide optimal nutrition
- Deliver satisfying meal service based on special needs & preferences

Control and decrease foodservice costs

- Scale recipes according to current census & avoid overproduction
- Effectively track budget

Save time

- Automation of many labor-intensive tasks

Commit fewer errors

- Menu-specific tray tickets
- Interface between modules ensures continuity of information

Simplify and improve survey compliance

- Computer-generated resident & tally reports
- Access therapeutic spreadsheets for menu nutritional analysis information

Flexibility

- Inclusion of 1200 tested, HACCP-compliant recipes, which can be modified
